Test Required for above (please circle): DNA				SIRE VERIFICATION	AM	NH	CA	PI (at EMAI)	

NOTE:*All bulls submitted for DNA profiling must also have sire verification completed. Therefore please fill out the details for the sire of the animal. Sire DNA case numbers can be found by using the Animal Search facility on www.murraygrey.com.au or by contacting the MGBCS. A charge of \$5.00 will be levied to you if sire verification is not requested at the same time as the DNA type is completed. *DAM verification is not required by the MGBCS, but is optional for animal owners.*

Donor dams used in ET programs only require a DNA type to be completed. Please turn the page for a complete list of prices.

Abbreviations: AM - Arthrogryposis Multiplex; NH - Neuropathic Hydrdocephalus; CA - Contractural Arachnodacyly
