

Mount Major Murray Greys 2026

Wednesday 7th October 2026, 12.30 pm

871 Dookie Rd, Yabba North, Victoria

Auctions Plus sale
with On-Farm interface
and Open Day

AuctionsPlus

Offering 16 bulls and 8 females

www.mountmajormurraygreys.com.au

WELCOME

It is with great pleasure that we welcome you to this year's sale. Looking back on last year's sale, we were delighted with the way the day came together and, most importantly, with the number of returning clients and friends who supported us. We are grateful to everyone who has continued to put their trust in our program. It is always rewarding to hear from clients about the success they are achieving with our genetics in their own herds.

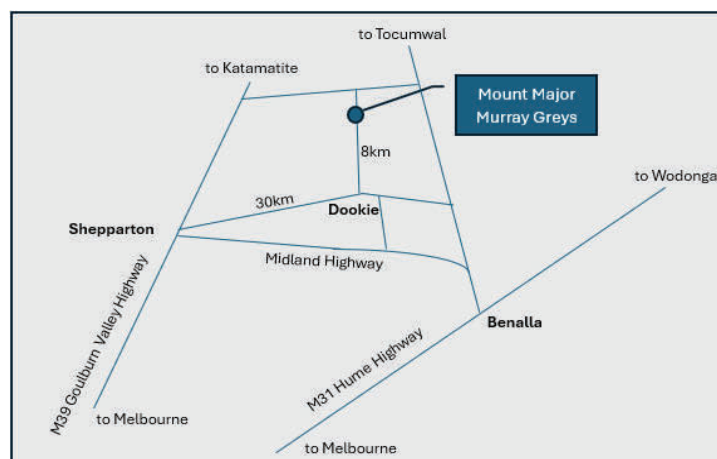

After a couple of challenging years and a hot, dry summer, we were fortunate to receive an early break and an excellent autumn season. It is remarkable the difference a good run of green grass makes and the young bulls are looking fantastic as a result. We were fortunate to purchase a number of heifers from Cadfor this year and we would like to acknowledge Rod's significant contribution to the breed and the impact he has had over many years. Davo will certainly miss his regular chats with Rod about genetics, cattle and everything in between. We are also excited about the first calves now on the ground by Mount Major VIP and Bottlesford Up Market, who are both looking outstanding and are certainly giving us plenty to look forward to.

This year we have a cracking selection of young bulls and heifers on offer, along with a couple of cows with calves at foot. Our focus is on providing quiet, well-handled bulls that will produce soft, well-muscled, thick, meaty calves for our clients. We believe in combining structurally correct cattle with reliable data and genetics that can be trusted. Every calf is weighed at birth, then again at 200, 400 and 600 days. All youngstock are independently scanned and assessed, including foot scoring, and we undertake genetic testing. No young bull is offered for sale until it has passed a full veterinary breeding soundness examination.

Full raw data is included in the supplementary sheets. If you would like additional information, including photos of feet or videos of individual animals, please get in touch. We are more than happy to provide whatever we can to help you make the most informed decision possible. Ultimately, we want our clients to buy with confidence and go home with an animal that will work for them for years to come.

We hope our open day will be a great opportunity to catch up with fellow breeders and friends. We warmly invite you to join us for morning tea and lunch—we'd love to see you and have a chat. Thank you again for your continued support of our program. We look forward to welcoming you to this year's sale.

Best regards, Davo, Sarah, Ted and Maisie

Directions

Mount Major Murray Greys is at 871 Dookie Rd, Yabba North. We are 8km north of Dookie along Saddleback Rd (also known as Dookie Rd).

SALE NOTES

Guarantee

Mount Major bulls are guaranteed for two joinings or two years from the date of sale, whichever comes first.

If your new bull proves to be structurally unsound, infertile or incapable of service we will provide a suitable replacement of similar value if available OR issue a refund equal to the purchase price less the salvage value.

This guarantee applies providing the bull's incapacity is not caused by an accident, injury, mis-management or disease contracted since leaving Mount Major Murray Greys.

Any dispute will be settled by a veterinarian appointed by and paid for by Mount Major Murray Greys and the claim must be made within two years of the sale date.

Insurance

Insurance can be arranged with the agents on sale day. All bulls are the buyer's responsibility from the fall of the hammer. Every care but not responsibility will be taken by the vendors between the fall of the hammer and loading for delivery.

Transport

Mount Major will deliver purchased lots within a 100 km radius of Yabba North free of charge, if requested. All other arrangements are the purchaser's responsibility. Mount Major can recommend the following carriers: Joe Wilton (0408 739 559), Neville Montgomery (0439 614 464).

Group Breedplan

Murray Grey Group Breedplan has been used throughout the catalogue. All cattle are weighed at birth and at 200, 400 and 600 days. A comprehensive set of Breedplan figures is provided for each bull and female lot.

Scanning & assessment

All our youngstock are scanned and independently assessed at 12-14 months by Liam Cardile of BeefXcel, a BreedPlan accredited assessor. Refer to Supplementary Sheet for results and raw data, and updated EBV figures.

Feeding regime

Mount Major Murray Greys are maintained on a diet of pasture and hay. As with all ruminants, any change in diet needs to be gradual so if you decide to introduce grain feeding, allow 2 weeks for them to adjust. It is particularly important to avoid a growth check as young bulls settle into their new home, as this could compromise semen quality.

These young bulls are about 14 months old and still have a lot of growing to do. They should be kept well-fed until joining and when they are pulled out of the paddock after joining they will still need looking after if they are to reach their potential.

We are accredited with the Greenham's "Never Ever" program and are regularly audited as a "no grain" herd.

Animal health

Our sale bulls are all vaccinated against vibriosis and with 7-in-1. They are due for 7-in-1 boosters in February. We are only offering for sale, animals that have tested free of pestivirus. Mount Major Murray Greys has tested free of Johnes Disease (currently JBAS6).

SALE NOTES continued

Genetic testing

At 200 days we submit tail hairs for 100K genotyping and parentage verification. We are only offering for sale animals that have tested free of the myostatin NT821 double muscling gene.

Bull breeding soundness testing

Our sale bulls are all tested for breeding soundness, including semen morphology. Refer to Supplementary Sheet for results. Our sale bulls are all tested for breeding soundness by GV Vets, including semen morphology. Acceptable targets for bulls of this age are: scrotal circumference - 30 cm, motility - 60%, morphology - 70%. Refer to Supplementary Sheet for results.

Registration transfers

All animals offered for sale are registered with the Murray Grey Beef Cattle Society and are eligible for stud registration transfer.

Inspections

Inspections are welcome at any time prior to the sale and from 10 am on sale day, 7th October. **Please contact-Davo to arrange inspections on 0459 999 662 or davommmg@gmail.com.**

Auction process

The sale will be a Helmsman auction conducted online by the AuctionsPlus bidding system. A live interface will be available on farm. Agents will operate under ALPA livestock auction terms and conditions of sale. All buyers are required to register with the agents before the commencement of the sale. On completion of the sale successful purchasers are to complete purchaser instructions in writing and provide to the agent when checking off.

Safety

Under normal conditions are bulls and females are placid and well-handled, however crowd pressure on sale day may alter their behaviour. Care must be taken when inspecting cattle—please do not crowd the bulls and ask for assistance if you would like closer inspection or are feeling at all nervous. Visitors enter the pens at their own risk. Children must not enter the pens at any time.

Supplementary sheets and withdrawals

Supplementary sheets will have further data on weights, scanning, assessment (including foot scores), bull breeding soundness exam results.

Cattle will be withdrawn from the sale if do not meet pass their conformation assessment and full bull breeding soundness exam, or if they are injured.

GST

Cattle are sold GST exclusive and will be invoiced with GST added.

Morning tea & lunch

Please join us from 10 am for morning tea and for lunch at 12 pm before the AuctionsPlus **sale starts at 12.30 pm**.

Disclaimer

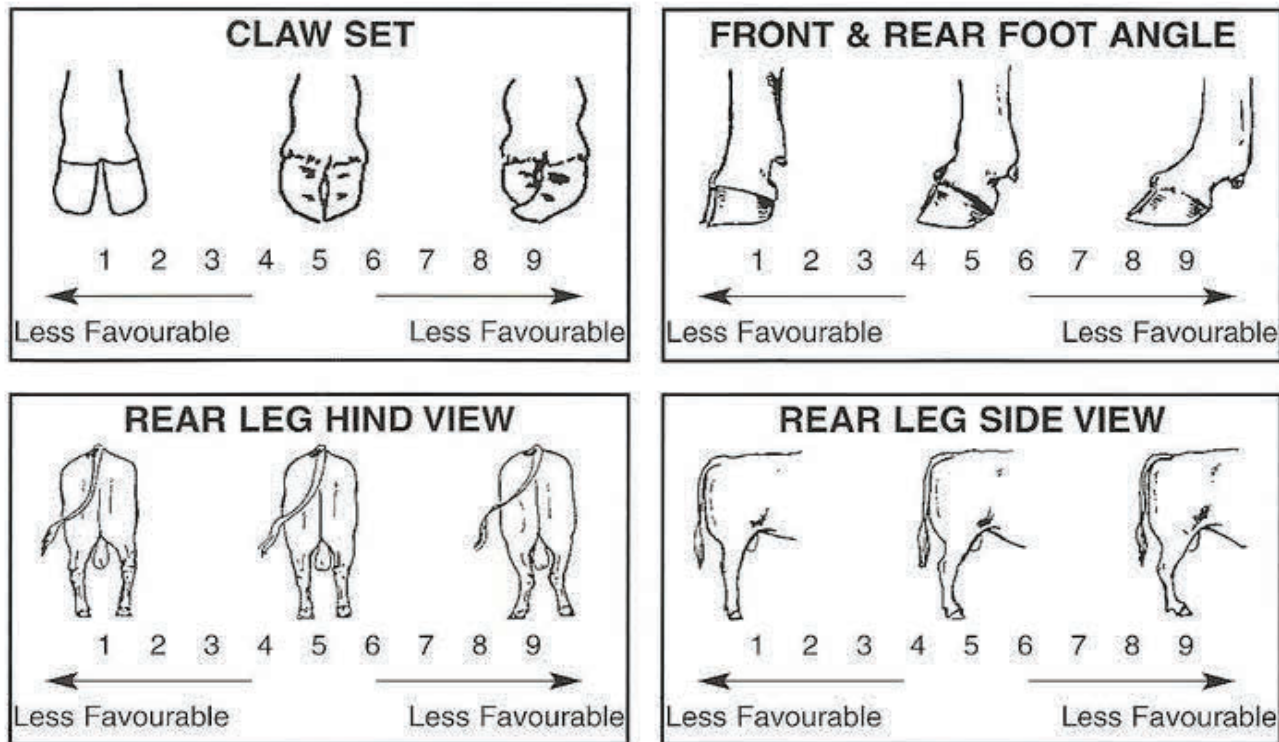

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

UNDERSTANDING EBVs

BREEDPLAN EBVs and selection indexes remove the effects of nongenetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best estimate of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

	Trait	Description
Calving	Calving Ease Direct (%)	Higher (or more positive) CEDir EBVs indicate that two year old heifers will have less difficulty when calving this sire's progeny.
	Calving Ease Daughters (%)	Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at two years of age
	Gestation Length (days)	Bulls with lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.
Growth	Birth Weight (kg)	Bulls with lower, less positive BWt EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).
	200, 400 & 600 Day Weight (kg)	Bulls with larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).
	Mature Cow Weight (kg)	Bulls with larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self replacing or maternal production systems.
	Milk (kg)	Bulls with higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such
Fertility	Scrotal Size (cm)	Bulls with larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.
	Days to Calving (days)	Bulls with lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval from bull-in date to calving.
Carcass	Carcase Weight (kg)	Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcase weights.
	Eye Muscle Area (sq cm)	Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.
	Rib and Rump Fat (mm)	Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcase weight. The desire for more or less fat will depend on the finishing ability of your animals.
	Retail Beef Yield (%)	Bulls with higher (or more positive) RBY EBVs are expected to produce progeny with higher yielding carcasses.
	Intramuscular Fat (%)	Bulls with higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

STRUCTURAL ASSESSMENT

Feet and Legs

The Beef Class Structural Assessment System uses a 1-9 scoring system

Score 5 is ideal

Score 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.

Score 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal.

Score 2 or 8 are low scoring animals and would be culled from the herd at Mount Major Murray Greys.

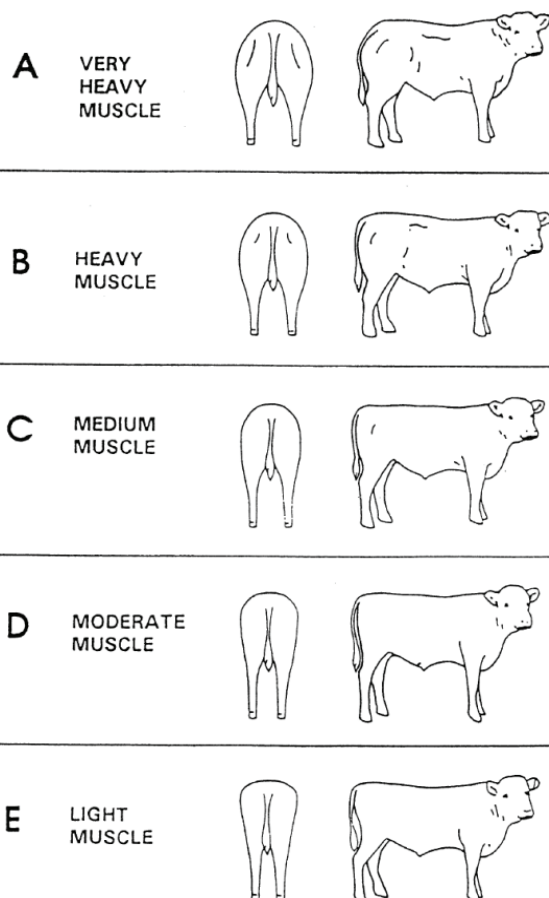

Score 1 or 9 are considered culls.

Temperament

The Temperament or docility score separates animals from their contemporaries on their calmness in a confined area. Animals which are extremely quiet (touchable) score '1'. Animals that are aggressive or extremely agitated in the crush are scored as '5'.

Sheath

The sheath score indicates the "tightness" of the sheath. '5' is tight (ideal), '1' is loose (undesirable).

BUYING YEARLING BULLS

At Mount Major Murray Greys we sell our bulls at 14-15 months of age, produced on pasture and hay. We do not feed grain. There is no doubt that 2 year old bulls finished on grain will look larger and better conditioned. However, we believe that our young bulls provide many advantages for our clients and we take every effort to guarantee they have reached sexual maturity before they are sold.

Murray Grey yearling bulls will generally be sexually mature if they:

- are well grown
- are in good condition
- are 12 months of age or older
- have a scrotal circumference of 32 cm or more at 12–14 months

We only sell bulls that have passed a full bull breeding soundness exam, including sperm morphology, to ensure they are sexually mature and ready to work.

Benefits of yearling bulls

- Extend the working lives of bulls by a year or more, lowering the bulls costs of a herd.
- Superior fitness and lower levels of body fat meaning there is less stress on skeletal system and less likelihood of breakdown
- Usually fitter and more agile than older bulls (although not necessarily stronger)
- Settle in better, mix with other cattle more easily and are easier to handle than older bulls. Outside of joining, it has been our observation that there is less fighting in mixed age groups when there is a clear size difference, dominance is sorted out more quickly and fighting is less prolonged.
- Bulls first used as yearlings are less affected than older bulls by the two biggest causes of breakdowns in bulls: hip arthritis (over 50% of all wastage) and broken penis. Over-conditioning exacerbates both these conditions.

Managing yearling bulls

- **Joining** - for young bulls, we recommend a ratio of 15-20 cows to one bull. Mature bulls of 2 years and over can handle 30-35 cows. Sticking to these ratios will give you a tight calving pattern and avoid over-work. Bulls being used as mop-ups after a synchronising programme will face more intense workloads as all cows will be coming into heat in a short period so bull ratios need to be adjusted accordingly. They should not be joined in a group with older bulls because of dominance effects. Older bulls are larger in size and more dominant, and so may get up to 75% of the cows in calf while young, subordinate bulls miss out. There is also a greater risk of injury in mixed age joining groups.
- **Post-joining** - bulls first used as yearlings still have a lot of growing to do. When they are pulled out of the paddock after joining they will still need to be well-fed and their health attended to, if they are to reach their

HELMSMAN AUCTION with AUCTIONSPLUS

How the Helmsman Auction system works

- On arrival intending purchasers need to register with the agent.
- All animals in the catalogue are displayed for the inspection period and during the sale.
- When the sale commences all animals are on the market simultaneously.
- You may bid on any animal regardless of lot number.
- Bids will be made via AuctionsPlus. You can either place bids yourself, on your own mobile device, or through the agent at the sale.
- Bids will be displayed on a large screen. You will be able to see at a glance whether your bid stands or has been over bid.
- A bid cannot be retracted.
- You may open bidding at the reserve price indicated for each animal in the sale catalogue and contest bids in multiples as advised by the sales manager.
- If your “first choice” animal goes beyond your limits you can still bid on any other animal in the sale.
- The sale will be open for 15 minutes.
- At the end of 15 minutes a 2 minute bid clock will commence.
- A bid on any lot will restart the countdown clock.
- Any further bids on any lot will trigger the same process until a full 2 minute “no bid” period which will conclude the sale (or at the discretion of the sale manager).

If you have any concerns about how to participate in a Helmsman Auction , the agents will be happy to assist.

Why Helmsman?

- The Helmsman system combines the best features of an auction system and sale by private treaty.
- We believe that the Helmsman system will help purchasers to achieve better value for money. The simultaneous auction method enables you to switch to the best valued animal at any time during the sale.
- If you need more than one bull, Helmsman gives you the flexibility and time to average your purchase costs.
- You have more time to consider lodging a bid - you can re-assess each lot during the sale period without any pressure to make an instant decision.

Using AUCTIONSPLUS

To bid from home on AuctionsPlus you must register **at least 2 working days prior to the sale.** Alternatively you can bid using your local livestock agent, or through the agents on site.

Photos and videos of all lots will be on the AuctionsPlus site, and the Murray Grey Beef Cattle Society website.

How to register as an AuctionsPlus user/buyer

1. To sign up to AuctionsPlus, fill in your details and create a security PIN.
2. Verify your email and phone number.
3. Follow the steps to verify your ID.
4. Enter your PIC number, ABN and business details if relevant.
5. Carefully read and accept our user rules and responsibilities.
6. Complete the user quiz.
7. Submit your request to our team.

BULLS

LOT 1 MOUNT MAJOR WON WRON W1 (PB)

RENNYLEA L743 (AA)
THE GLEN INTENSITY P250 (GR1)
THE GLEN CLARA L201
Sire: MOUNT MAJOR TONY T13 (GR2)
MOUNT MAJOR NEON (PB)
MOUNT MAJOR DELVENE Q37 (PB)
MOUNT MAJOR DELVENE N35 (PB)

Born: 11/07/2025 Colour: Silver Tattoo: DVD25W1

NOTES: Won Wron is a super correct bull: solid and stylish. He'll be a herd improver in any herd. His EMA and IMF are in the top 1% of the breed - he's just got outstanding figures across the board. On top of that, he's got beautiful feet and fantastic structure - his feet and legs are very structurally correct and he's got very good thickness and softness so he provides excellent type with outstanding carcass traits.

MOUNT MAJOR NEON (PB)
MOUNT MAJOR DELVENE Q37 (PB)
MOUNT MAJOR DELVENE N35 (PB)

Born: 20/08/2025 Colour: Grey Tattoo: DVD25W46

NOTES: Josie W46 an excellent, long, thick heifer that will be ideal for the domestic market. She's by Tony out of one of our very good Josie cows. She's got plenty of length and thickness and I think she'll grow like her dam: thick, meaty and super soft.

WILLALOOKA ARTHUR A598 (PB)
CADFOR BEROLEANNE D138 (PB)
GLENLIAM FARM BEROLEANNE X91 (PB)

NOTES: REFERENCE SIRE: Taurus has grown into a big, raw bull. He boasts outstanding growth and carcass EBVs - carcass weight, EMA and growth EBVs are all in the top 1% of the breed. He's bred to excel in both growth rate and meat quality, ensuring his progeny will be highly desirable for both feedlot and grass-fed markets.
